AI JUDGMENT TWINS FOR REGULATED ENTERPRISES

WisdomTwin

Your best judgment. Available when the decision can't wait.

We sell speed at AI-native pace: governed decisions in minutes, not meeting cycles.

Pre-seed · USD $1M post-money SAFE

roman@wisdomtwin.ai · wisdomtwin.ai · Demo film (2:54): wisdomtwin.ai/demo

WisdomTwin, Inc. · Delaware C Corporation

Scan: 2:54 demo

THE PROBLEM

AI moves in seconds. Your decisions still wait for calendars.

Critical judgment is trapped in senior people, fragmented documents and meeting cycles. When the expert is unavailable or leaves, the organization loses speed and memory. Regulated teams cannot paste consequential work into a public chatbot, so the meeting stays the bottleneck.

275

interruptions per employee per day

57%

of the workday spent communicating about work, 43% creating

10,000

Americans turn 65 every day. Their judgment walks out the door.

Result: decisions that should take minutes wait days.

Sources: Microsoft Work Trend Index 2025 (275) and 2023 (57%); US Census Bureau (10,000 per day).

MISSION

Expand human working memory from 7 items to 1 million, and make it available 24/7.

An executive's judgment is bottlenecked into a 40-hour week and about seven items of working memory. Pair each critical role with a Wisdom Twin holding a million-token context of that role's decisions, and the week changes shape.

Context

7 → 1M

working-memory items per critical role

Coverage

40h → 120h

judgment availability per week

Rhythm

6 a.m. → 2 a.m.

Brainstorm at 6 a.m., answers by 2 a.m. No 2 a.m. calls.

Design targets, not measured pilot results.

CATEGORY

Asynchronous management, for the first time as a practical operating model.

01 Skype proved video calls. Zoom removed the friction and owned the category.

02 Email, docs and voice memos tried async leadership. No judgment layer, no governance.

03 WisdomTwin makes it real: one press replaces links, invites and calendar lag.

Salesforce said NO SOFTWARE and created SaaS. We say NO MEETINGS. Your twin goes so you do not have to.

"The Zoom for management" describes the category only. WisdomTwin has no affiliation with Zoom.

WHY NOW

The category is funded. The regulated decision is still open.

Category proof

Viven

USD $35M seed, October 2025, led by Khosla Ventures.

Category proof

Twin1

USD $20M seed, August 2026, co-led by Bessemer, Tribeca Venture Partners and Aramco Ventures.

Our wedge

Built for the regulated decision

Role-level thresholds and escalation rules, a deterministic Trust Layer outside the model, and private cloud, on-premises or air-gapped deployment.

Models now reason over decades of evidence. Regulators accept explainability, human override and audit as a governance pattern. Private and air-gapped inference is practical.

Category validated. Wedge differentiated. Product built. Commercial proof next.

Sources: public funding announcements, Viven 2025-10-15 and Twin1 2026-08-20; verified 2026-08-28.

PRODUCT

One press. 24/7/365. Full audit.

01 · Speed

One-Press Huddle

Press once for a live audio huddle with your management team, day or night. No links, no calendar lag. Recorded and transcribed.

02 · Judgment

Wisdom Twin

Role-specific judgment, not a cloned person. Trained on 10 to 20 years of a role's authorized evidence: principles, exceptions, thresholds, escalation rules.

03 · Control

Trust Layer

Cited evidence, source permissions, named human validation, confidence decomposition, safe decline, audit logs and human override.

See it: the 2:54 demo film at wisdomtwin.ai/demo. Synthetic scenario, labeled as such.

HOW IT WORKS

Ingest, Twin, Operate. Evidence becomes judgment, under human control.

Step 1

Ingest

Authorized evidence only: emails, meetings, docs, SOPs, filings. Immutable evidence objects with source-level permissions.

→

Step 2

Twin

Decision episodes rebuilt: why, not just what. The role is the unit. Nothing is authoritative until a named human signs off.

→

Step 3

Operate

One-press huddles and async reviews with cited answers, policy gates and safe decline. Every action audited.

Decision → Audit → Smarter Twin. Every governed decision compounds.

Deployable in private cloud, VPC, on-premises or air-gapped. Model-agnostic.

BUYER

Regulated enterprises need speed, but cannot trade away control.

They must preserve provenance, permissions, policy context, auditability and named accountability. Public copilots cannot clear a risk committee on those terms.

- Banking & capital markets
- Insurance
- Healthcare & pharma administration
- Legal & compliance
- Government
- Crown corporations

The Trust Layer makes speed deployable.

Private cloud · On-premises · Air-gapped · Model-agnostic

Governed speed must be provable to a risk committee.

MOAT

Every governed decision makes the organization faster.

01

Decision Episode Schema

Structured record of real decisions: evidence, policy version, context, outcome. Easy to copy, hard to populate.

02

Role Wisdom Graph

Principles, exceptions, conflicting precedents and escalation paths. Captures why, and compounds per customer.

03

Judgment Policy Engine

Deterministic precedence, permissions, confidence thresholds and safe decline. Code the model cannot talk past.

04

Judgment Evaluation Dataset

Held-out scenarios with expert labels, built with each customer. The asset that proves fidelity.

No patents or exclusive data claimed. The moat is the compounding validation dataset plus the governance runtime.

MARKET

Every regulated decision waiting on a calendar.

Serviceable market, bottom-up

20,000 to 30,000 mid-market and enterprise firms with 10+ executive roles
× about USD $300K average annual contract

USD $6 to 9B

200 organizations at the USD $500K/yr tier = USD $100M ARR.

Beachhead: Toronto

Dense concentration of banks, insurers, pensions and crown corporations, plus AI talent. Founder-led sales.

Expansion: MENA via Dubai

Async by design across time zones. Sovereign and air-gapped deployment as the default.

Internal bottom-up model, not a third-party estimate.

BUSINESS MODEL

One price per stage. One unit: the role.

Stage	Investment	Term	Roles
Judgment Assessment	USD $0	Entry scoping	n/a
Concept Validation	USD $50,000	2 months	10
Structured Pilot	USD $250,000	6 months	50
Commercial	USD $500,000+ per year	Annual	500

Beyond included roles: USD $5,000 one-time setup plus USD $500 per month per role. No tokens, no meters, no per-question billing.

The raise and the first revenue stage are the same number: 20 Concept Validations at USD $50,000.

WHERE WE ARE

Working product. Pre-revenue. A clear next milestone.

What exists today

- Multi-speaker audio huddles, recorded and transcribed
- Evidence timelines and decision episodes with citations
- Human validation, confidence decomposition, policy denial, safe decline
- Held-out evaluation framework for judgment fidelity
- Five founder-built industry scenarios, synthetic and labeled

Client outcome

We used our own twin to win a government RFP for Talent Lab. Talent Lab's CEO said on our podcast that the win generated USD $5.5M in revenue for her company in 2025. A client outcome on the record, not WisdomTwin product revenue.

Next: lighthouse pilots

One organization, one critical role, one authorized evidence set, a named success gate. Land one role, prove fidelity, expand.

WisdomTwin, Inc.: Delaware C Corporation, incorporated August 24, 2026.

TEAM

Builder and compliance architect. Two halves of the same problem.

RB

Roman Bodnarchuk

Co-Founder & CEO

Toronto · full-time, writes the code

- 28 years turning executive judgment into systems
- Founded N5R in 1998; Procter & Gamble's digital agency of record for six years
- Clients include P&G (21 brands), Apple, Microsoft, General Motors, Hershey's, Abbott Labs, Marriott/Ritz-Carlton and Four Seasons, across 15 countries
- Built the current WisdomTwin product end to end

SC

Stella Cabrera

Co-Founder, Governance & Institutional Trust

Dubai · full-time on close of the pre-seed

- 20+ years with banks, fintechs and regulators
- Chairman and Past President, RMA Toronto; co-author, RMA x OSFI operational resilience guidance
- Senior Advisor and MENA Lead, EDM Association (700+ firms, 30,000 data professionals)

"We understand the risk committee because I already chair one."

Toronto and Dubai: 24/7 coverage. We run asynchronous management before we sell it.

THE ASK

Raising USD $1,000,000 pre-seed on a post-money SAFE.

Governance and audit

Controls, explainability and audit infrastructure

Connectors and evaluation

Source connectors with permissions; evaluation dataset

Private deployment

VPC, on-premises and air-gapped profiles

Forward-deployed engineering

Lighthouse pilot delivery

Founder-led go-to-market

Toronto and MENA

USD $400K hardware and software

Nvidia Blackwell, Dell XPS Linux laptops, Mac Studios

USD $1M funds roughly 18 months of founder-led runway and the path to 15 to 20 Concept Validations, converting to Structured Pilots and the first Commercial cohort.

SAFE terms confirmed on request with counsel.

18-MONTH PLAN

A sales plan with dates. The seed gate is named in advance.

M0

Close

SAFE closes. Stella moves to full-time. Governance hardening and source connectors begin.

M1 to 3

First validations

Evaluation dataset and customer-hosted profiles ship. First 5 Concept Validations signed in Toronto.

M4 to 9

Scale validations

15 to 20 Concept Validations. Lighthouse pilots run against named success gates.

M10 to 18

Convert

Validations convert to Structured Pilots and the first Commercial cohort. MENA opens via Dubai.

Seed gate: 15 to 20 validations signed, lighthouse pilots passing held-out fidelity evaluation, first commercial conversions.

roman@wisdomtwin.ai · Book 15 minutes: calendly.com/romanbodnarchuk/15min · Demo: wisdomtwin.ai/demo

Forward-looking plan, not a projection of measured results.
